

Make the most of your future.

FAST FACTS ABOUT YOUR PLAN

There are many great benefits to being a participant in the HAH Holdings, LLC 401(k) Plan. Among those benefits is exceptional customer service— online or by phone. In fact, you can count on your company and Fidelity to help support you every step of the way.

Best practices to consider:

- **The impact of an early start.** Your decision to start today could give you quite a bit more at retirement than starting five years from now.
- **Contribute as much as you can.** That amount can take you a long way toward reaching your financial goals.
- **Do what you can afford.** Start at a number that feels comfortable to you. You can always change it later. The important thing is to invest what you can afford and start right away.
- **Invest more in your plan, pay less in taxes.** Your pretax contributions come out of your pay before income taxes are taken out. You can actually lower your current taxes by investing in the plan today.

Find out how simple it can be to enroll, manage your account, and take advantage of what your company and Fidelity have to offer.

- Look inside for:
 - **Frequently Asked Questions** - The basic details of your plan including how much you can contribute and when you can take withdrawals.
 - **Investment Options** - Pick at least one investment option to get started, then consider the whole spectrum as you get more comfortable with planning.
 - **Resources for Staying on Track** - To help you meet your retirement goals, the plan offers a comprehensive communications program and planning tools to help you stay on track.

Enroll in the retirement plan

If you haven't already, enrolling in your plan is the right step towards a more secure retirement.

It's easy to join your plan and make that next great investment in yourself.

Here's how:

- First, go to Fidelity NetBenefits® at www.401k.com.
- Next, set up your password. If you're already a Fidelity customer, you can use your existing password. Please note, you will be prompted to enter your email address.
- Finally, click on the link to enroll.
- If you have questions or need help before getting started, visit www.401k.com or call Fidelity at 1-800-835-5097.

This spectrum, with the exception of the Domestic Equity category, is based on Fidelity's analysis of the characteristics of the general investment categories and not on the actual investment options and their holdings, which can change frequently. Investment options in the Domestic Equity category are based on the options' Morningstar categories as of the date indicated. There may be a number of funds in each category and each may have a significantly different risk profile as compared to other funds within that category as well as compared to funds in other categories on the spectrum. Morningstar categories are based on a fund's style as measured by its underlying portfolio holdings over the past three years and may change at any time. These style calculations do not represent the investment options' objectives and do not predict the investment options' future styles. Investment options are listed in alphabetical order within each investment category. Risk associated with the investment options can vary significantly within each particular investment category and the relative risk of categories may change under certain economic conditions. For a more complete discussion of risk associated with the mutual fund options, please read the prospectuses before making your investment decisions. The spectrum does not represent actual or implied performance.

***You could lose money by investing in a money market fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Fidelity Investments and its affiliates, the fund's sponsor, have no legal obligation to provide financial support to money market funds and you should not expect that the sponsor will provide financial support to the fund at any time.**

In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible.

Stock markets are volatile and can fluctuate significantly in response to company, industry, political, regulatory, market, or economic developments. Investing in stock involves risks, including the loss of principal.

Before investing in any investment option, consider the investment objectives, risks, charges, and expenses. Contact Fidelity for a mutual fund prospectus or, if available, a summary prospectus containing this information. Read it carefully.

Additional Investment Options

Target Date Funds offer a blend of stocks, bonds, and short-term investments within a single fund. They are designed for investors who don't want to go through the process of picking several funds from the three asset classes but who still want to diversify among stocks, bonds, and short-term investments.

Investment Options to the left have potentially more inflation risk and less investment risk

Investment Options to the right have potentially less inflation risk and more investment risk

Target date investments are generally designed for investors expecting to retire around the year indicated in each investment's name. The investments are managed to gradually become more conservative over time. The investment risks of each target date investment change over time as its asset allocation changes. They are subject to the volatility of the financial markets, including equity and fixed income investments in the U.S. and abroad and may be subject to risks associated with investing in high yield, small cap and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates.
